CRAFTY CUTS LASER

Introduction

It is the aim of this report to provide the client with an understanding of where the current system is in terms of development. This report will cover the 3rd delivery cycle and describe the functions which are being delivered for this delivery cycle. Lastly the report will allow for the client to provide some feedback and or acceptance with regards to the completed functions.

Delivery Cycle Overview

Overall Delivery Cycle Plan

Function description

Customer makes inquiry – Function 3.0

From the user's main navigation panel, users can click contact us to make an inquiry. This will bring up a form to allow users write their inquiry. The system will ask for the input of name, email address, subject of the inquiry and the inquiry content. After user fulfilled all the contents, they can click submit to send the inquiry to admin. Admin will receive an email after users submitted the form.

Customer Forgot Password. -- Function 6.0

From the login page, if a customer has forgotten their password they will need to click on forgot password button under the email field. It will take the customer to a page where he/she needs to enter her/his registered email address. If the entered email is not correct or not registered in the system, then the system will show an error message. If the email is registered then the system will generate random password and send it to the registered email address. From here the customer can log back in with the randomly generated password.

Update Customer -- Function 7.3.2

From the navigation bar in the "My account" page, the admin can click the view all customers to check all the customers and when the admin click the edit, they will be able to edit the details of that customer to help them update her/his personal details (address, post code, etc.). After the admin has done edit, the details of that customer will be update once the admin clicks to submit the form.

View item – Function 7.6.2

From the account menu, the admin can click on view products. This will bring up a list of all current products. If the admin clicks view it will take them to the product listing, where they can see the product as logged in customer sees it.

From the customer's perspective, the customer click the store will see all the currently available item and if they click read more, they will be redirect to product details page and they will be able to see the details of that item.

Update item – Function 7.6.3

Navigating from the Admin options menu the admin will click on view products, then edit product. From here the admin will be presented with a form, to update the product name,status and description. As of build 3, the editing of a product and then the many variations are separated.

Example, product: Apple, may come in 2 sizes and 10 colours. If the admin would like to edit apple they can follow the steps above and edit the name, product status and description. In order to edit the colours and sizing the admin will need to edit each individual listing. This will be improved upon in build 4, so that the variations of a products are grouped together and can be edited all at once.

Delete item – Function 7.6.4

The admin navigates from their account menu to "List products" from there the admin can click on delete, which will delete the entire product and its variations (colours, sizes etc) from the website. The deletion of a very specific variant is not yet easily support but this too will be improved upon in DC4.

Admin Forgot Password. -- Function 8.0

From the login page, if the admin has forgotten his/her password, then they will need to click on the forgot password button under the email field. It will take the admin to a page where he/she needs to enter her/his registered email address. If the entered email is not correct or not registered in the system, then the system will show an error message. If the email is registered then the system will generate random password and send it to the registered email address. From here the admin can log back in with the randomly generated password.

Acceptance Forms
